

APPLICANT-ENROLLMENT FUNNEL AND IMPACT DASHBOARD

Pwani Teknowgalz • 2026 Reach Goal

Data-driven visibility for expanding access to STEM opportunities.

Osená Linda

Peculiar Hassan

THE PROBLEM

A visibility gap is limiting Pwani Teknowgalz's ability to scale impact.

20,000+

applications received

6,800

young women enrolled

≈15%

current reach

GOAL: 50% BY END OF 2026

Applicant, enrollment and program data are spread across programs and counties, making it difficult to see where the funnel breaks down.

Without this visibility, outreach, resource allocation and evidence-based funding decisions become harder.

Applicants

20,000+

Enrolled

6,800

Goal

50%

OUR SOLUTION

A unified applicant-to-enrollment analytics workflow.

01

CONSOLIDATE

Bring applicant, enrollment and program records into one clean dataset.

02

ANALYZE

Measure funnel drop-off by county, age and program.

03

VISUALIZE

Build an interactive dashboard to track reach and gaps.

04

HAND OVER

Provide a simple process for staff to keep it updated.

WHAT SUCCESS LOOKS LIKE

Validated figures • 3+ actionable insights • Progress toward 50% visible • Non-technical staff can update the dashboard

PROJECT APPROACH

From discovery to validated dashboard and staff handover.

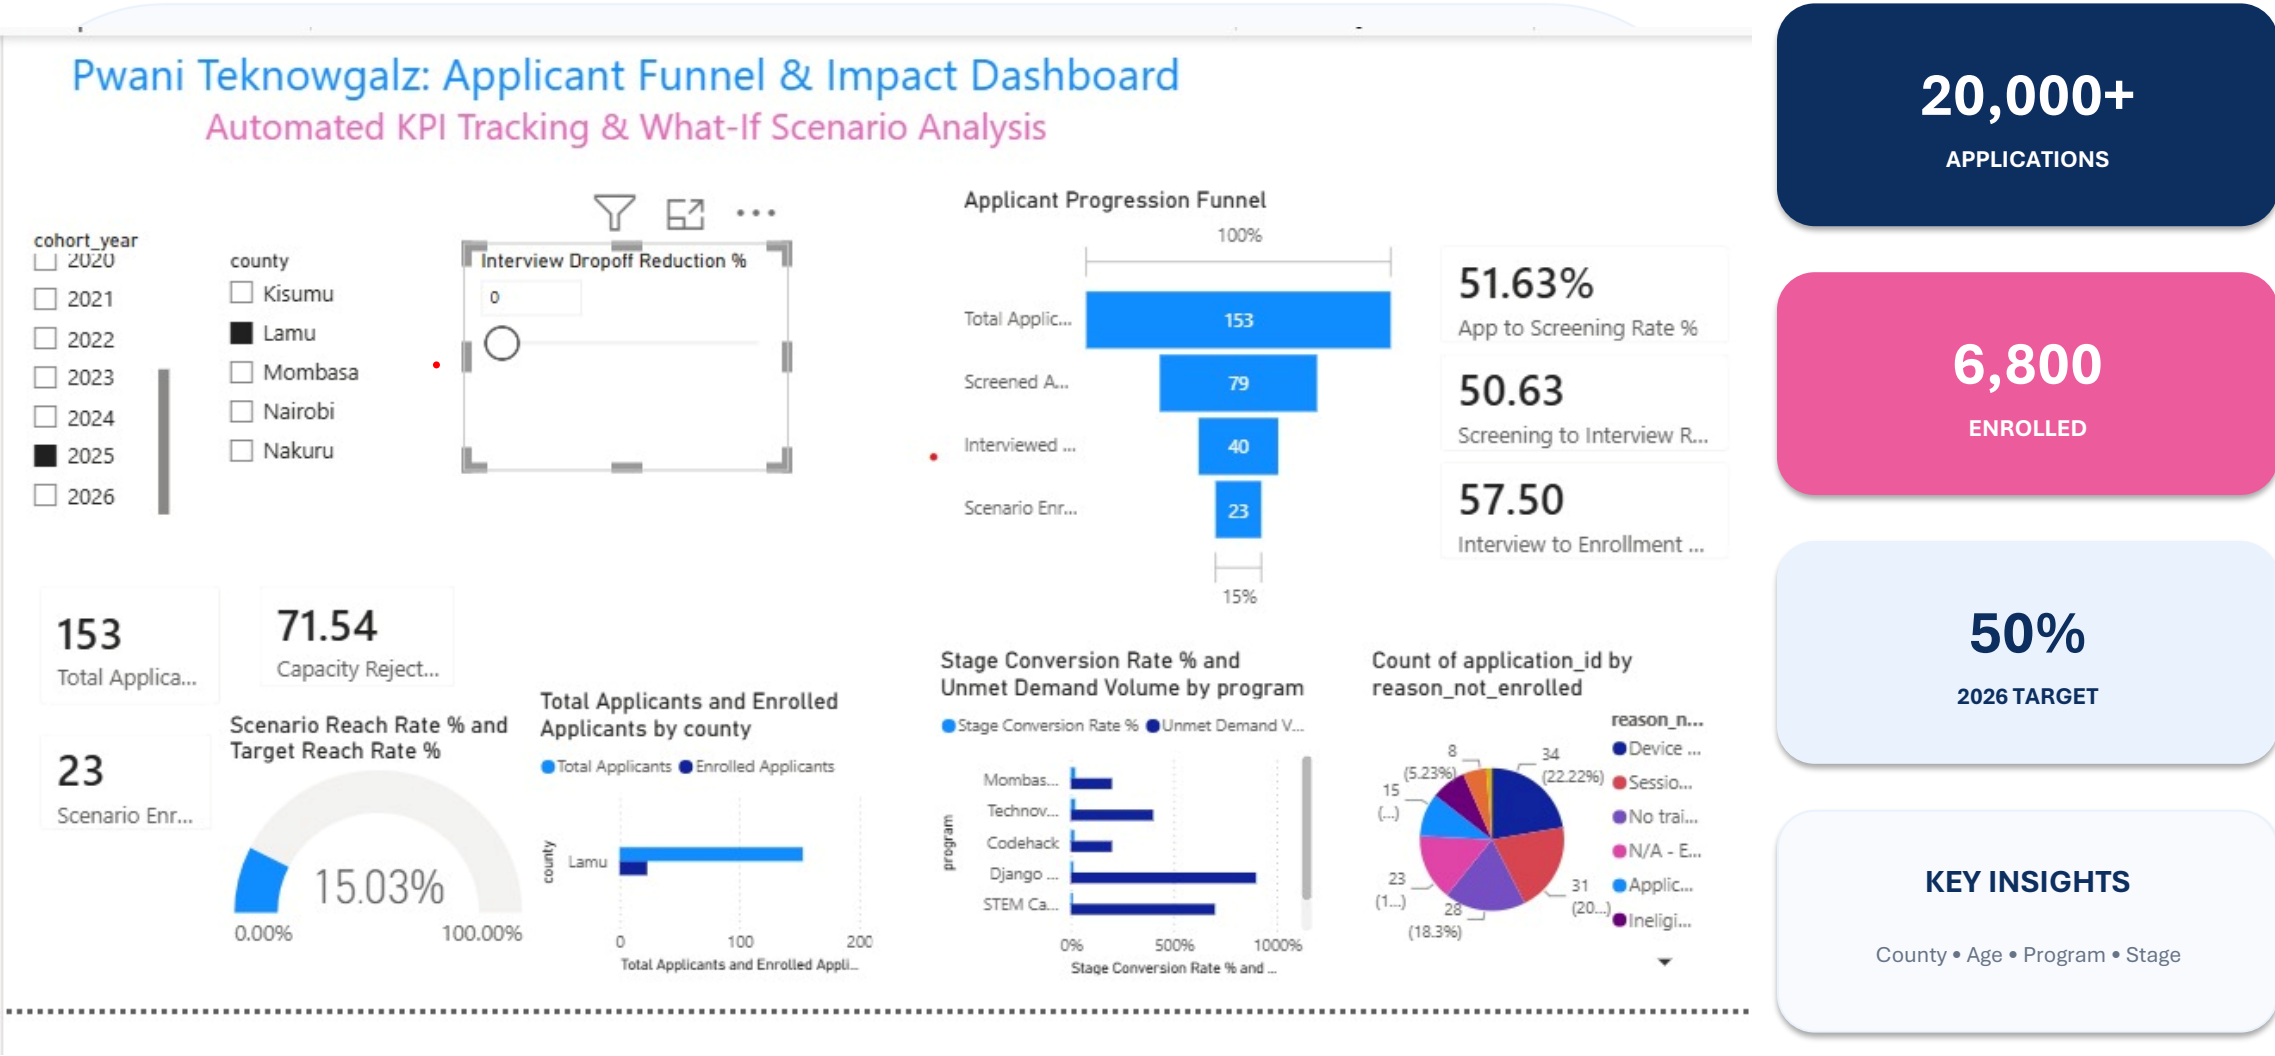

TOOLS

- Python / pandas
- PowerBI/DAX
- Excel/Google Sheets
- Streamlit
- Plotly Express & Graph Objects
- Git/GitHub

Scope: descriptive & diagnostic analysis, not predictive modeling.

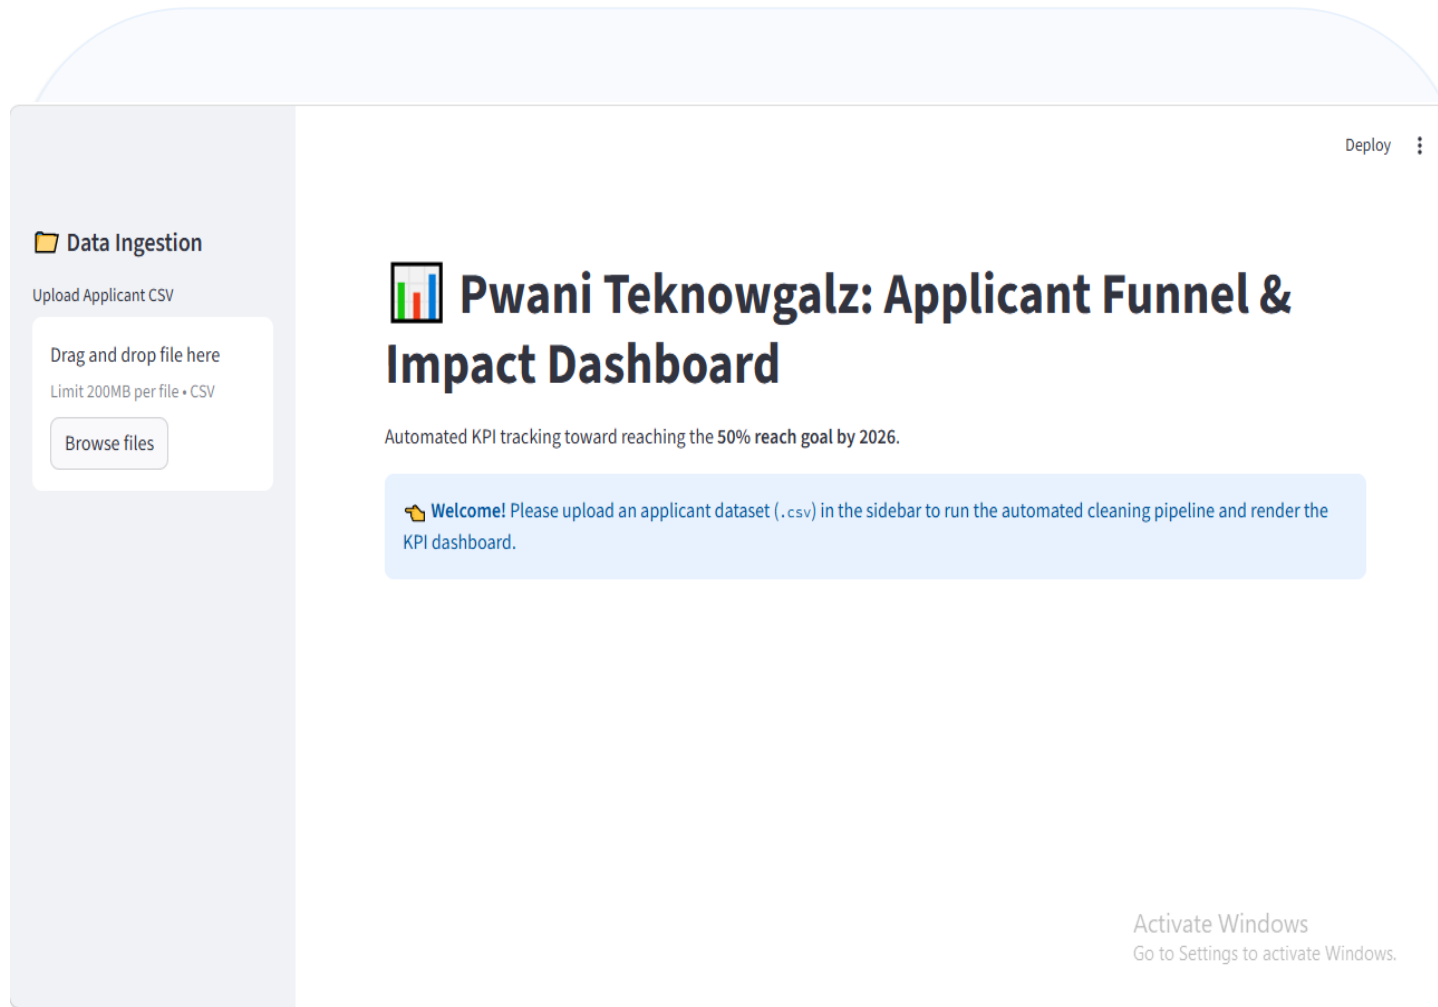

POWER BI DASHBOARD

Interactive visibility into the applicant funnel and 2026 reach target.
